

# Roch D'Amour

DevOps, SRE & Platform Engineering

📍 Québec, Canada  
✉ [roch.damour@gmail.com](mailto:roch.damour@gmail.com)  
🌐 [notarock.lol](https://notarock.lol)

## Skills

### Programming

Scripts, non-trivial software and internal tooling

Golang, Nix, Bash, Python, JS/TS

### Cloud Services Providers

AWS, GCP, Azure

### Software Development Life Cycle

From commit to production including security and compliance.

## Interests

### Homelab

Self-hosted services, Kubernetes, NixOS

### Going Outside

Hiking, Fishing, Gardening, Kayaking

## Certifications

### GitHub Administration

🔗 [Credly](https://credly.com/certifications/roch-damour)

### Terraform Associate 003

🔗 [Credly](https://credly.com/certifications/roch-damour)

## Languages

### French

First Language

### English

Fluent, spoken & written

### Spanish

Learning for future travel

## Experience

### Arctiq

DevOps Consultant

🔗 <https://arctiq.com/>

Since 04/2023

Canada

- Built CI/CD Pipelines for software repositories in languages such as Java, Javascript, Python, Golang and C#.
- Updated and delivered Terraform workshops for customers.
- Helped the GitHub team of a financial institution to build and offer "Managed DevOps" in GH Actions using a product-centric approach.
- Built thought leadership surrounding Platform Engineering practices to improve Developer Experience within the company.

### Stingray Digital

Site Reliability Developer

🔗 <https://www.stingray.com>

01/2022 – 04/2023

Montréal, Canada

- Built CLI tools and pipeline plugins to provide a comprehensive and easy-to-use CI/CD experience for all developers using Golang.
- Developed Kubernetes operators that automatically manage cloud resources such as back-ups jobs, service networking and IDP integrations.
- Implemented a Application Security "Criticality Score" qualification system allowing the automatic classification of code repositories in terms of security and quality requirements.
- Deployed SIEM solution across AWS accounts to improve the security posture.

### Civalgo

DevOps Developer

🔗 <https://www.civalgo.com/>

01/2020 – 12/2021

Montréal, Canada

- Introduced the GitHub Flow branching strategy to streamline versioning, deployment and version managements across core microservices.
- Developed reusable CI/CD pipelines for core web services.
- Deployed infrastructure-as-code and monitoring, reducing MTTR by more than half.

## Projects

### Slopify

Short-form content generation

🔗 <https://notarock.lol/projects/slopify/>

### Technews-bot

News aggregator for Discord

🔗 <https://github.com/notarock/technews-bot>

## Education

### École de Technologie Supérieure (ETS)

Software Engineering

🔗 <https://www.etsmtl.ca/>

2023

Bachelor

### Cégep de Granby

I.T. Technician

🔗 <https://cegepgranby.ca/>

2017

College Degree

## Volunteering

### Club Cedille

Member/Leader/Mentor

🔗 <https://cedille.etsmtl.ca/>

2017-2021

Montréal, Canada

- Build the club's DevOps practice by offering website development and hosting for other students clubs.
- Mentor and guide new members into ongoing projects.
